

# Harvesting the Potatoes

Potatoes are harvested from May through to November. Once harvested they are stored and then transported to the shops or factories to make things like oven chips and crisps.

Name five places where you can buy potatoes?

OWN POTATOES**

# The Potato Plant

Colour up the potato plant.  
It takes up to four times your  
summer holiday for the plant to  
grow and be ready to harvest.

Can you name three  
products which potatoes  
are used to make?
